SUMMARY

Software Engineer with 3+ years of experience building scalable full-stack web applications, responsive user interfaces, and high-performance APIs using React.js, Angular, Node.js, SQL, and cloud-native technologies. Proven track record of optimizing system performance, developing mobile-friendly applications, and delivering secure, user-focused solutions across finance and healthcare domains. Strong collaborator with hands-on experience across the full software development lifecycle, including frontend development, backend services, database optimization, testing, and deployment in agile environments.

SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL, C#, HTML5, CSS3
Frontend & Web Development: React.js, Angular, Tailwind CSS, JavaScript/jQuery, Responsive Web, Mobile Development, REST APIs, GraphQL
Backend & Frameworks: Node.js, Express.js, Spring Boot, Django REST Framework, ASP.NET, MVC, SQLAlchemy
Databases & Search: PostgreSQL, MySQL, SQLite, Redis, Elasticsearch
Cloud & DevOps: AWS (S3, Lambda, API Gateway), Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Git
Testing & Tools: Postman, PyTest, JUnit, Agile/Scrum, JIRA, Debugging, Performance Optimization
Messaging & Modern Technologies: Kafka, RabbitMQ, Celery, OpenAI APIs, RAG Pipelines

PROFESSIONAL EXPERIENCE

Aligned Rewards (Startup Collaboration, Arizona State University) | Frontend Engineer | Remote (US) Jan 2026 – May 2026

- Developed responsive React workflows for AI-assisted goal creation with dynamic rendering and state management.
- Built multi-step forms with validation and responsive UI components for seamless user workflows.
- Integrated REST APIs for draft management, ensuring reliable data persistence and workflow consistency.
- Collaborated in Agile/Scrum teams to deliver scalable, user-focused web application features.
- Optimized React interfaces for responsive performance and consistent user experience across devices.

Capgemini Technology Services India Ltd. | Software Engineer | INDIA Jun 2023 – Jun 2024

- Designed and owned a high-throughput distributed platform using Spring Boot, Node.js, and React.js to aggregate real-time financial data from multiple sources, enabling low-latency dashboards used by 1,000+ global analysts.
- Architected and led an event-driven microservices platform using Docker, Kubernetes, Apache Kafka, and RabbitMQ, implementing parallel processing and fault-tolerant workflows to automate settlement reconciliation, reducing processing time to under 40 minutes per batch.
- Designed and scaled 100+ RESTful and GraphQL APIs secured with OAuth2, enabling seamless integration between internal banking systems and external providers, handling 300,000+ API calls daily with high availability and resilience.
- Led CI/CD and release engineering strategy using Git, Docker, Kubernetes, and automated testing frameworks, enabling zero-downtime deployments, rollback strategies, and highly reliable release cycles.
- Designed and optimized large-scale search infrastructure using Elasticsearch within Spring Boot services, indexing over 6 million trade records and enabling low-latency queries supporting 70,000+ searches with sub-second response times.
- Integrated LLM-based systems using OpenAI APIs and RAG pipelines to build context-aware trade summarization and intelligent reporting systems, reducing manual effort by 40% and accelerating decision-making workflows.
- Mentored engineers and led engineering best practices, conducting design reviews, improving code quality, and authoring architecture and API documentation to enhance maintainability and cross-team collaboration.

Capgemini Technology Services India Ltd. | Software Engineer | INDIA Mar 2022 – Jun 2023

- Designed and delivered scalable frontend architecture using Angular (10+) and TypeScript for healthcare workflows, improving usability, accessibility, and reliability of clinician-facing applications handling critical data.
- Built and owned secure backend services and APIs using Node.js and Express, enabling concurrent access to healthcare data systems and external integrations, handling 10,000+ requests with high availability and stability.
- Developed high-performance UI components using React.js and Redux, applying lazy loading, memoization, and performance optimization techniques to significantly improve page load times and user interaction.
- Led frontend modernization and design standardization initiative by migrating legacy CSS systems to Tailwind CSS, improving scalability, consistency, and maintainability across 5+ applications.
- Optimized backend performance and database efficiency through indexing, caching, and query optimization strategies, reducing infrastructure costs by 20% while improving response times.
- Implemented automated data workflows and AI-driven summarization systems using cron jobs and OpenAI APIs, enabling efficient processing of large-scale datasets and improving reporting accuracy across operational systems.

PROJECTS

AI Infrastructure Research Dashboard [GitHub](#) [Demo Video](#) Mar 2026

- Architected a full-stack AI research dashboard using React, TypeScript, FastAPI, PostgreSQL, and Redis with role-based access and dashboards.
- Implemented async data pipelines and unified search workflows using Celery, SQLAlchemy, PostgreSQL FTS, and Docker for scalable processing.

LegalEase - AI-Powered Contract Analyzer [GitHub](#) [Demo Video](#) Dec 2025

- Created a contract analysis platform using React, Django REST Framework, PostgreSQL, Celery, Redis, and OpenAI APIs with JWT authentication.
- Built responsive contract workflows with clause extraction, risk analysis, REST APIs, and real-time document tracking.

Receipt Genie - AI-Powered Receipt Dashboard & Budgeting App [GitHub](#) [Demo Video](#) Jun 2025

- Developed an AI-powered expense tracker using Python, Streamlit, SQLAlchemy, SQLite, and OpenAI GPT-4o with analytics dashboards.
- Built secure receipt processing and budgeting features with CSV/Excel/PDF exports, duplicate detection, and mobile-friendly UI optimization.

EDUCATION

Master of Science in Software Engineering | Arizona State University, USA May 2026

Bachelor of Engineering in Information Technology | Pune University, INDIA May 2022
